

# Title

---

## CSCI321 Meeting notes

- User manual (**Dyalan**) 
  - For every function, describe how the user will be interacting with it
- Website 
- Technical manual

## Basic mode and advanced mode of the infographic

- Class diagram
- Use case diagrams (**Wee**)
- State diagrams
- Sequence diagram for simulation (**Elle**) 
- Database schema/data dictionary
- Thread management 
  - How to deal with it
- How we are going to test it 
  - ie the process (user acceptance testing etc)
- Conventions going to be used (how comments, variables) 
- **UI design** process: People testing (Quiz) methodologies (Describe mouse only and keyboard + mouse input - and why we would go for mouse) (**Kapil**) 
- **Any assumptions** : resources that people will need to use it, user (**Kapil**)
- **Minimum** requirements to use
- Load testing : How we may do this process
