Title

CSCI321 Meeting notes

- User manual (**Dyalan**)

  • For every function, describe how the user will be interacting with it

- Technical manual

Basic mode and advanced mode of the infographic

  • Class diagram

  • Use case diagrams (**Wee**)

  • State diagrams

  • Sequence diagram for simulation (**Elle**)

  • Database schema/data dictionary

  • Thread management

    - How to deal with it

  • How we are going to test it

    - ie the process (user acceptance testing etc)

  • Conventions going to be used (how comments, variables)

  • UI design process: People testing (Quiz) methodologies (Describe mouse only and keyboard + mouse input - and why we would go for mouse) (**Kapil**)

  • Any assumptions : resources that people will need to use it, user (**Kapil**)

  • Minimum requirements to use

  • Load testing : How we may do this process
